

Brent Gloy, Ph.D.

Bachelor of Science, Agricultural Honors, 1994, University of Nebraska-Lincoln, NE

Master of Science, Agricultural Economics, 1996, Purdue University, IN

Doctor of Philosophy, Agricultural Economics, 1999, Purdue University, IN

Assistant Professor, Department of Applied Economics and Management, Cornell University, NY, 1999 – 2005

Associate Professor, Department Extension Leader in Department of Applied Economics and Management, Cornell University, NY, 2005 - Present

Brent Gloy was a recipient of the USDA National Needs Fellowship from 1996-1999. During that time he completed his Ph.D. in Agricultural Economics with a focus on agribusiness. The National Needs Fellowship played a key role in his decision to continue his education. The experiences and knowledge that were gained during the three years of education funded by the National Needs Fellowship truly changed his life by giving him the opportunity to focus on his research and education and work with leading faculty. The ability to work with the tremendous faculty at Purdue without concern over how the graduate stipend would be funded allowed him to work with outstanding graduate mentors. After graduation he has been employed in the Department of Applied Economics and Management at Cornell University where he currently holds the rank of Associate Professor.

Today Dr. Gloy teaches and conducts research and extension programs in the areas of agricultural finance and agribusiness management. His research examines the linkages between management and the financial performance of agribusiness firms. He also studies how factors in the external economic environment, including public policy, impact the profitability of agribusiness and agricultural finance firms. In addition, to his extension program, Dr. Gloy currently serves as the Department Extension Leader for Applied Economics and Management at Cornell.

Dr. Gloy teaches an undergraduate course in Agribusiness Strategy and a graduate course in Agricultural Finance. He is actively involved with Cornell's Agribusiness Fellows Program, co-teaching a 2 week international field study of the food and agribusiness systems of selected foreign countries. In the past, groups have traveled to Hungary, Slovakia, Poland, Holland, and Australia. He has also participated in farm management study trips to leading agribusinesses in California, Texas, Florida, and Georgia. Additionally, he has led the Farm Credit Fellows program where students are

paired with a lender and borrower in order to complete an intensive investment analysis and credit committee report. The Fellows then travel to New York City where they visit with several key financial market participants.

An Agricultural Economist, Brent received his M.S. and Ph.D. from Purdue University. In addition to his activities at Cornell, Brent remains involved in the family farm business located in Southwestern Nebraska.
